

Graham Park Sewage Pumping Station & Force Main Improvement Project

August 8, 2017

SA Project Manager: Akshay Kumar

Design Engineer: GHD, Inc.

Program Manager: RK&K

Service Authority
Exceptional Water Service

Agenda

- ◆ Definitions
- ◆ Purpose of the Project
- ◆ Existing and Proposed Sewage Pumping Station and Force Main
- ◆ Existing and Proposed SPS and FM Easements
- ◆ Construction Notes of Interest
- ◆ Anticipated Project Duration
- ◆ Contacts
- ◆ Q&A

Definitions

- ◆ **Sewershed** – Defines the area that contributes wastewater flows to a single point.
- ◆ **Gravity Sewer** – System of pipes and manholes that transports wastewater by gravity within a sewershed.
- ◆ **Sewage Pumping Station** – A pumping station is the collection point for a gravity sewer system and provides conveyance of the sewage to another sewershed, pumping station or a treatment plant.
- ◆ **Force Main** – System of pipes and valves that transports wastewater under pressure from a pumping station.
- ◆ **Discharge Manhole** – Vertical access shaft from the ground surface to a sewer or underground utilities.

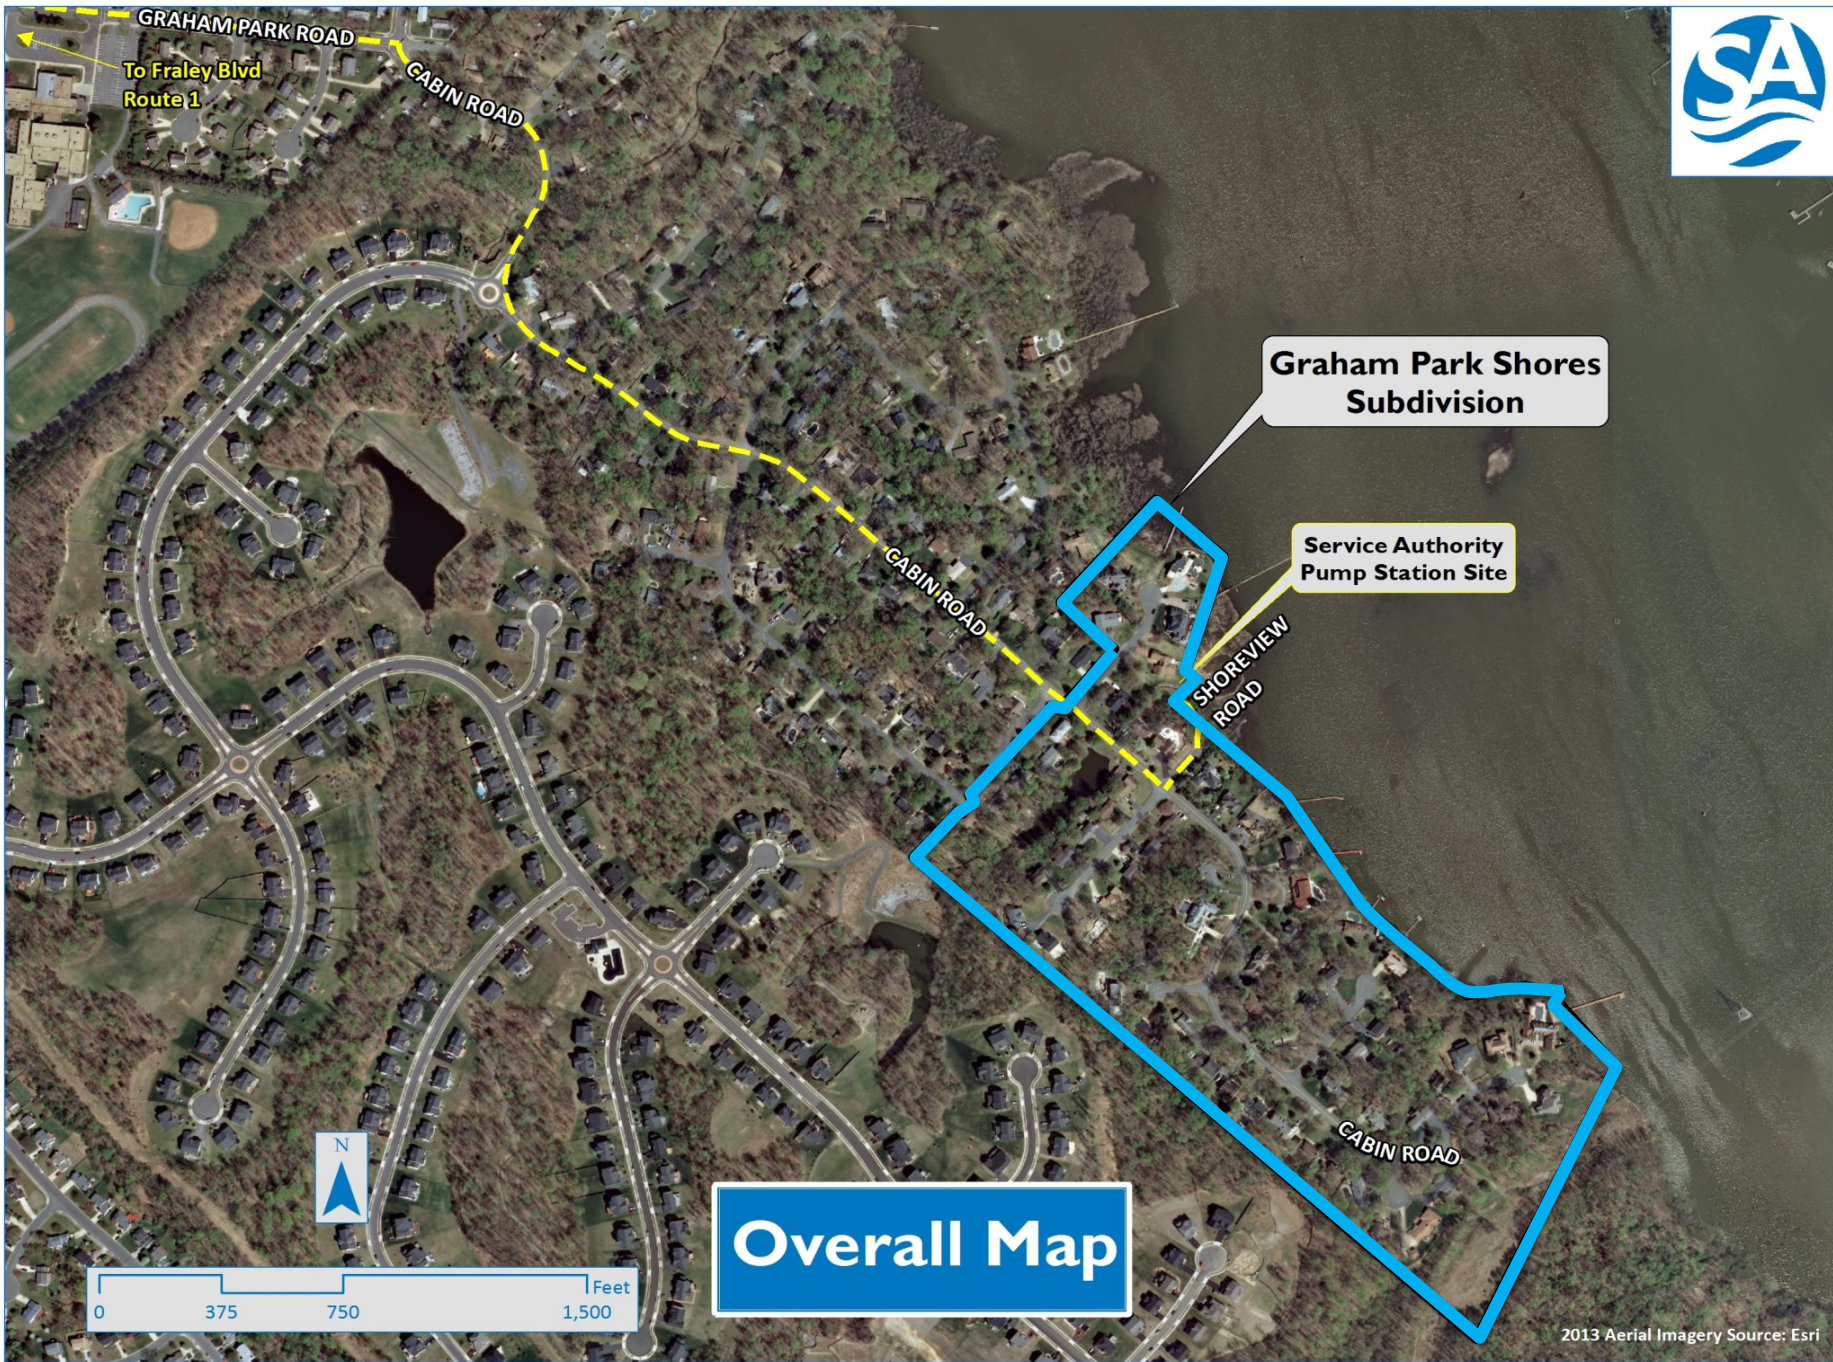

Purpose of the Project

◆ Purpose of the Project

- ◆ Replace an existing antiquated Sewage Pumping Station and Force Main.
- ◆ Improve Sewage Pumping Station reliability.
- ◆ Raise equipment above 100-year flood plain elevation.

◆ Benefits of the Project

- ◆ Improve Safety Conditions.
- ◆ Maintain the SA's Commitment to Service Reliability.

**Graham Park Shores
Subdivision**

**Service Authority
Pump Station Site**

Notes Of Interest During Construction

- Ensure unimpeded emergency, school bus, trash, mail and other services.
- The SA will restore roads to their existing or better conditions if disturbed by construction activities.
- Daily clean-up along the access roads to the Pumping Station by the Contractor will be required.
- Temporary parking areas will be negotiated by the Contractor with property owners and VDOT prior to construction.
- An SA Inspector will cover this project and others nearby on a daily basis.

Anticipated Project Schedule

- Public Facility Review Process:
 - PFR Hearing - September 20, 2017
- Design and Permitting Timeframe:
 - December 2015 – November 2018
- Anticipated Start of Construction:
 - Spring 2019
- Anticipated Construction Duration:
 - Approximately 1 year
